Greenback edges down; yen at weakest level in 34 years

THE US dollar edged down but was near 5½-month highs on Wednesday (Apr 17) as Federal Reserve officials reiterated that the rate-cutting cycle was on hold pending new economic data, while the pricing of the monetary easing outlook for G10 central banks was roughly unchanged.

Top US central bank officials including Fed chair Jerome Powell backed away on Tuesday from providing any guidance on when interest rates may be cut, saying instead that monetary policy needed to be restrictive for longer.

Recent data suggested that the US economy was on a different track compared with the Fed's forecasts, leading investors to reduce their bets on future rate cuts. Meanwhile, risks of a broadening Middle East conflict added to the dollar's short-term appeal as a safe-haven asset.

Some analysts said they were still bullish on the greenback at the current levels. "On any escalation of the Middle East crisis, we would expect the US dollar to benefit from safe-haven flows," said Jane Foley, senior forex strategist at Rabobank, confirming the target for the euro/dollar at 1.05.

Against a basket of currencies, the dollar was last down 0.2 per cent at 106.12, just shy of the five-month peak of 106.51 touched on Tuesday. The index is up 4.8 per cent for the year.

The yen last hovered just below 154.79 per dollar, its weakest level in 34 years. Market participants raised the bar of a possible intervention by the Bank of Japan (BOJ) to prop up the Japanese currency, now mentioning the 155 level from the previous 152, even if they believed the BOJ could step in at any time.

They flagged that the latest fall in the Japanese currency was in line with fundamentals, reflecting the pricing of Fed policy, and that authorities were analysing not just the recent yen declines but factors that were driving the moves.

"We think that the potential for BoJ to intervene to bolster the yen appears less evident, given that the dollar is strengthening on a relatively more hawkish Fed," said Yvan Berthou, forex strategist at UBS Investment Bank.

Market participants believe that as long as the fall in yen is gradual and led by fundamentals, the probability of a BOJ intervention is low. "Rhetoric from officials has been more focused on speed of a move rather than levels themselves," said Kieran Williams, head of Asia FX at InTouch Capital Markets. Japan last intervened in the currency market in 2022, spending an estimated US\$60 billion to defend the yen. REUTERS
